

# JEFF AXEL P. ORIG

## COMPUTER ENGINEERING STUDENT | OJT / INTERN APPLICANT

Tagbilaran City, Bohol | +63 981 600 0811 | [axeljep26@gmail.com](mailto:axeljep26@gmail.com)

### SUMMARY

Creating practical solutions through technology and innovation. A Computer Engineering student experienced in software, electronics, and project-based systems, with a passion for problem-solving and continuous learning.

### NOTABLE ACHIEVEMENTS

#### EvLaunch 2 Attendance System UI Development

Designed and developed the user interface of the EvLaunch 2 Attendance System to improve navigation, usability, and user experience for easier attendance management.

#### PCB Building Seminar

Participated in a seminar focused on PCB design and building, gaining knowledge about circuit layout, electronic components, and PCB development processes.

### PROJECT

#### Binary Tree Visualizer (Web-Based)

#### Subject Requirement

Developed a web-based application that visually demonstrates binary tree operations such as insertion, traversal, and node management for easier understanding of data structures.

#### PCB 3-Bit Calculator and Traffic Light Simulator (CALFIC)

#### Subject Requirement

Developed a PCB-based system that can function as both a traffic light simulator and a 3-bit calculator through mode switching, demonstrating digital logic design and circuit integration.

#### 3-Bit to 16-Segment Letter Decoder

#### Subject Requirement

Created a digital logic circuit that converts 3-bit binary input into letters displayed on a 16-segment display using logic gate implementation.

#### IoT Smart Locker System

#### Subject Requirement

Developed an IoT-based smart locker system that uses sensors and microcontroller technology for secure and automated locker access.

#### Preemptive Scheduler Calculator

#### Subject Requirement

Developed a scheduling calculator that simulates preemptive CPU scheduling algorithms and calculates process execution results for operating system analysis.

### EDUCATION

|            |   |                                                                                                                                                                |
|------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tertiary   | : | University of Bohol, College of Engineering, Technology, Architecture and Fine Arts<br>Dr. Cecilio Putong Street, Cogon Tagbilaran City, Bohol<br>2023-Present |
| Secondary  | : | Cor Jesu Institute of Mabini Inc.<br>Mabini, Davao de Oro<br>S.Y. 2017-2023                                                                                    |
| Elementary | : | Mabini Central Elementary School<br>Mabini, Davao de Oro<br>S.Y. 2011-2017                                                                                     |

### ADDITIONAL INFORMATION

**Skills:** Software Development (Python), Web Development (HTML, CSS, JavaScript, PHP), and CAD (AutoCAD).

**Interests:** PCB Designing, UI/UX Design, and Electronics and Embedded Systems

## CHARACTER REFERENCE
